

Post doc position opening :

“Casimir effect and Radiative Heat Transfer with Nanostructured Systems ”

Context of the Post-Doc project:

The “Theory of Light-Matter and Quantum Phenomena” team (see <https://sites.google.com/site/mauroantezza/home> for more information) at the Laboratory Charles Coulomb in Montpellier (France) is looking for a highly motivated post-doc researcher which will work on the theory of the Casimir effect and of the Radiative Heat Transfer in nanostructured systems, in close collaboration with international experimental teams. The 2-years postdoc position is already available.

For more information, interested candidates can contact the group leader Prof. M. Antezza (mauro.antezza@umontpellier.fr) and provide a detailed CV.
